Skip,

The MCHM samples and other related materials were successfully consolidated and transferred to J103.

The unrelated Petroleum samples in the G206 fridge, to be used for future incoming MCHM samples, were also transferred to J103.

Work Request #2014-001 is now complete.

I will follow-up on the paperwork.

Tom Kellum

Hazardous Materials Technician

Environmental Management Services, Inc.

Hazardous Waste and Emergency Services Contractor

U. S. EPA, Region III

Environmental Science Center

**Subject:** RE: Samples in G206

John: No Problem.

Tom: Since I think this will take longer than 15 minutes, please consider this as a formal "Work Request" being issued.

Work Request Number = 2014-001

Estimate of hours = 1 – 2 hours

ESC Contact Person = John Curry (5-2608)

Description of work: EMSI is assist OASQA in over packing the odorous MCHM samples from the Freedom Industry Chemical Spill, all MCHM Standards and other materials, then assist in the internal transport the chemicals/materials to a single designated laboratory for consolidation. EMSI will also assist in relocating any chemicals or samples present in the consolidated laboratory needed to make room for in-coming materials.

Once completed, EMSI will provide a "Work Request Survey" for OASQA to complete.

Thanks, Skip

**Subject:** Samples in G206

Hi Skip

Can I have EMSI assist me in removing some samples from the refrigerator in G206. I do not know how long they have been in there but they have a very strong petroleum smell to them.

Thanks.
